Dear Students, Staff, Parents and Community,

Introduction

The topic of safety and security is vital to the mission of the Pine-Richland School District. As such, the entire Pine-Richland community is aware of the importance of school safety, and the protection of students and staff. Many efforts are made to address this issue, including ongoing training for staff, regular drills and exercises, and the implementation of new technologies and procedures.

Physical Structures

The topic of safety involves the transformation of safety-related resources into physical structures and buildings within the district. For example, security systems are in place to ensure the safety and security of all buildings. The school buildings are designed with safety in mind, with emergency exits and疏散 routes clearly marked.

Physical Security

The need for a comprehensive security plan has led to the development of a system that effectively monitors the school buildings. This system includes video cameras, alarm systems, and security personnel. The school district also conducts regular security audits to ensure that all security measures are in place.

Personnel

The district is committed to maintaining a safe and secure environment for all students and staff. This includes ensuring that all personnel are trained in safety procedures and that they are aware of the importance of security.

Emergency Operations Plan

The district has an Emergency Operations Plan (EOP) that outlines procedures and protocols in the event of an emergency. The plan is reviewed and updated annually to ensure its effectiveness.

Important District Safety & Security Procedures & Initiatives

December 18, 2019

The Pine-Richland School District continues to focus on ensuring a safe and secure learning environment for all students and staff. In this message, we would like to highlight some procedures and protocols at a high level. Please read the entire message to ensure awareness of the scope of initiatives.

Pine-Richland School District

Affirming Learning for the Student Today and Beyond

December 18, 2019

To the Extent Possible,

Physical Security

The district has implemented a variety of physical security measures to ensure the safety and security of all buildings. These measures include:

- Video cameras: The school district has installed video cameras throughout all buildings to monitor activity and deter criminal activity.
- Security personnel: The district employs security personnel to provide an additional layer of security.
- Emergency exits: All buildings have clearly marked emergency exits and疏散 routes.

Personnel

The district is committed to maintaining a safe and secure environment for all students and staff. This includes ensuring that all personnel are trained in safety procedures and that they are aware of the importance of security.
